Objective

Passionate BTech Computer Science and Engineering student with strong foundations in web development and problem-solving with hands-on experience building responsive web applications. Highly eager to apply my skills through impactful real-world projects, internships, and growth-focused opportunities.

Skills

- **Languages:** *Python, Java, JavaScript, C , C + +*
- **Web Technologies:** *HTML5, CSS3, Bootstrap*
- **Tools & Databases:** *MongoDB, MySQL, Git, GitHub, VS Code*

Education

- **Techno Engineering College Banipur** *Aug 2023 – July 2027*
  Bachelor of Technology in Computer Science and Engineering
  - GPA: 7.44/10.0
  - **Coursework:** Data Structures and Algorithms, Operating Systems, Object-Oriented Programming
- **Sonamukhi BJ High School (H.S.)** *July 2020 – June 2022*
  West Bengal Council of Higher Secondary Education (Class XII)
  - Percentage: 94.4%
  - Stream: Science (Physics, Chemistry, Mathematics)
- **Sonamukhi BJ High School (H.S.)** *Jan 2019 – July 2020*
  West Bengal Board of Secondary Education (Class X)
  - Percentage: 83.7%

Projects

- **Weather web Application** *GitHub* *Live-Demo*

Developed a responsive and user-friendly weather web application integrated with OpenWeather API & open-meteo API.

  - Displayed current weather details (temperature, humidity, wind speed, visibility, precipitation) with city search, hourly and 10-day forecasts, dark/light theme toggle, and Celsius–Fahrenheit conversion.
  - **Technologies Used:** HTML, CSS, JavaScript.

- **Currency Converter Web Application** *GitHub* *Live- Demo*

A responsive web application that converts currency values using real-time exchange rates integrated with Free Currency Exchange Rates API.

  - Implemented amount input, currency selection, swap functionality, displayed dynamic country flags on currency change and real-time exchange value.
  - **Technologies Used:** HTML, CSS, JavaScript.

- **Number Guessing Game Web Application** *GitHub* *Live- Demo*

A simple interactive game where users guess a randomly generated number within a defined range.

  - Implemented random number generation, input validation, attempt tracking, reward/points calculation based on number of attempts, result messages, and game functionality.
  - **Technologies Used:** HTML, CSS, JavaScript.

Certifications

- **AI Skills Passport** *Nov 2025*
  EY and Microsoft
- **GenAI Powered Data Analytics Job Simulation** *Oct 2025*
  Forage
